About me

I'm a developer and designer based in Varaždin, Croatia. Always learning new things and doing amazing stuff with things I already know. I love all kinds of design, but I also love making something amazing out of my designs.

Latest work

Skills

Web dev

I know my way around [HTML](#), [CSS](#) and [JavaScript](#) (ES6). [Svelte](#) is my favorite JS framework, but I find [Blazor](#) (C#) also interesting. Besides that, I know some vanilla [PHP](#) and [NodeJS](#), but nothing too complex.

[WordPress](#) is my favorite tool for making good websites that are easy to manage. I can set up the website, customize it to client's liking, manage plugins, do some basic SEO optimization.

Design and creative

[Print](#), [logo](#) and [UI/UX design](#) are things I love doing. I use the [Adobe suite](#) (Photoshop, Illustrator, InDesign, Xd) and [Figma](#).

I can also do some [basic video and audio editing](#) in [Adobe Audition](#) and [Adobe After Effects](#).

Mobile and hybrid app dev

[Flutter](#) is my favorite cross-platform framework, I've done a couple of projects with it and I'm getting better every day. I also explored [Electron](#) for a bit and can make a basic app using it.

I know [basics](#) of [native Android](#) (Kotlin) and [native iOS](#) (Swift) development that I learned at faculty.

Dev – other

I've worked mostly with Microsoft technologies and I can develop [UWP](#), [WPF](#) and [WinForms](#) apps using [C#](#) and [XAML](#). I know some [C++](#) and [Python](#).

I'm comfortable with version control using [Git](#) and I've done some [basic CI/CD setups](#).

I worked in a couple of teams using [Agile and SCRUM](#) methodologies.

Languages

I'm a native speaker of [Croatian](#) and pretty good with [English](#) (~level C1).

Other

I'm pretty good with [LaTeX](#) and [Microsoft Office](#) and can do some [basic computer networking](#).
